QD. Answer the following questions.

Ans1. We came to know about the life of early man by studying fossils, tools and artefacts like utensils, pottery etc. and cave paintings.

Ans2. In Middle Stone Age main occupation of the people remained hunting and gathering. Apart from rough & chipped stone tools they made small, sharp & pointed tools. They started living in groups near sources of water and started cultivation of crops and domesticating animals.

Ans3. The early man used to live on trees and later on he lived in caves.

Ans4. Early man's cave paintings depicted hunting scenes & large wild animals, pictures of humans (represented as stick figures) outlines of their hands and abstract imagery.

Ans5. Fire helped the early man in many ways:

1. It protected them from wild animals.

2. It kept them warm.
3. They could cook their food.
4. It provided light in the dark caves.

Ans6.The different hominins that appeared before the modern man are: Homo habilis, Homo erectus.
