- | | |
|--------------------------------|-------------------------------|
| 1. b (weather changes) | 2. d (ozone) |
| 3. e (oceans) | 4. c (outermost layer) |
| 5. a (continents) | |

Q-D (TO BE DONE IN SST CLASSWORK COPY)

Answers of Q-D

Ans 1) The lithosphere is the solid part of the Earth.

It is useful to us in the following ways:-

- **Soil is the uppermost layer of the Earth's crust in which plants grow.**
- **Indirectly , soil supports life on the Earth as all living beings depend on plants for their food.**

Ans 2) Water is important to us in many ways such as

- **All living beings need water to drink.**
- **Plants need water to make their food.**
- **Water is used for domestic purposes like cooking , washing, and cleaning.**

Ans 3) The atmosphere is the envelope of several gases.

The different layers of the atmosphere are-

Troposphere

Stratosphere

Mesosphere

Thermosphere

Exosphere

Ans 4) Biosphere constitutes of all living beings like plants , human beings , animals, birds, and insects.

Ans 5) The Sun is important for Earth as it gives us heat and light. The sun light helps the plants to prepare food. All living organism directly or indirectly depend upon plants for their food. Energy from the Sun is called solar energy.
