QD. Answer the following questions.

Ans 1. Communication is the process by which we convey our ideas, thoughts and emotions to others. It is an exchange of information between two people or group of individuals.

Ans 2. Smoke signals were used to signal danger or transmit news.

Ans 3. Homing pigeons were the trained pigeons which would carry long distance messages. A written message was rolled into a small tube, attached to the homing pigeon's leg and was then send to the desired destination. They were mostly used as the main means of communication during the First world war by the US army.

Ans 4. The internet is useful because it helps us to get any type of

information on any subject from any part of the world within seconds. It plays an important role in our everyday lives.

- a. We can communicate instantly with people through emails.
- b. It gives information related to education business, weather, banking service etc.
- c. It also facilitates online shopping, reservation of tickets, payments of bills etc.

Ans 5. The printing press was invented by Johannes Gutenberg in Germany around 1440.

The printing press was an important invention because-

- a. It made it possible for books to be reproduced in hundreds and thousands.
- b. It led to the spread of literacy as printed books helped to spread knowledge.
- c. Books were available at affordable prices for everyone to read.
