SECOND TERM (2021-2022)
STD.-3 SCIENCE

Chapter-7 Forms of Matter: Solids, Liquids and Gases

Practice Paper with Model Answers

Q.1. Define the following terms:

- i. Mass – Mass is the amount of substance.
- ii. Fuel- Fuel is a substance that is burnt to get energy
- iii. Matter - Anything that has mass and occupies space is called matter.

Q.2. Differentiate between Solids, Liquids and Gases with two examples each.

Solids	Liquids	Gases
i. Solids have a fixed shape and size.	i. Liquids do not have a fixed shape and size. They take the shape of the container, they are kept into.	i. Gases do not have a fixed shape and size. They take up all the space available to them.
ii. Solids do not flow.	ii. Liquids can flow.	ii. Gases can flow freely in all directions.

Examples - table, book	Examples: water, milk	Examples - air, water vapour
